

Project Executable Files

Date	15 July 2026
Team ID	xxxxx
Project Name	FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / SQLite database	Yes
5	Environment configuration (.env.example)	Yes
6	Deployed application URL	No (Local Development)
7	APK / Executable Binary	NA (Web Application)
8	Dockerfile / Containerization Config	No
9	Test files and test results	Yes
10	Demo Video / Walkthrough	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

FinRelief-AI/
|-- frontend/
|   |-- src/
|   |   |-- components/
|   |   |-- pages/
|   |   |-- services/
|   |   |-- App.jsx
|   |   |-- main.jsx
|   |-- public/
|   |-- package.json
|   |-- vite.config.js
|-- backend/
|   |-- app/
|   |   |-- routes/
|   |   |-- models/
|   |   |-- schemas/
|   |   |-- services/
|   |   |-- database.py
|   |-- main.py
|   |-- requirements.txt
|   |-- .env.example
|   |-- finance.db
|-- README.md
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Local Development (Not Hosted)
Login Credentials (Demo)	Email: demo@finrelief.com Password: Demo@123
Platform / Hosting Provider	Localhost (Future deployment on Render/Vercel)
Repository Link	(Paste your GitHub repository link here)
Demo Video Link	(Paste your Google Drive/YouTube demo link here)

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Python 3.11+ and Node.js (v18 or later) installed on the system.

Step 1: Install Python 3.11+ and Node.js (v18 or later).

Step 2: Clone or download the project source code.

Step 3: Open the backend folder.

Step 4: Install dependencies: `pip install -r requirements.txt`

Step 5: Configure the .env file with your Google Gemini API key.

Step 6: Start the FastAPI backend: `uvicorn main:app --reload`

Step 7: Open the frontend folder.

Step 8: Install frontend packages: `npm install`

Step 9: Start the React application: `npm run dev`

Step 10: Open the browser and visit: `http://localhost:5173`

Step 11: Register a new user or use the demo credentials to log in.

Step 12: Test all modules including Loan Management, Financial Analysis, and AI Recommendations.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application is not deployed online	Runs successfully on local development environment
2	AI recommendations depend on Google Gemini API availability	Ensure a valid API key and internet connection
3	SQLite is suitable for development but not high-volume production	Can be upgraded to PostgreSQL or MySQL for production
