

Solution Requirements

Date	15 July 2026
Team ID	XXXXXX
Project Name	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely register, log in, and manage their accounts using email and password authentication.	High
2	Authorization Levels	The system provides role-based access for users and administrators to ensure secure access to features and data.	High
3	External Interfaces	The application integrates with Google Gemini AI API for AI-based financial analysis and recommendations.	High
4	Loan Management	Users can add, edit, update, and delete loan details, EMI schedules, and repayment information.	High
5	AI Financial Analysis	The AI analyzes financial data and provides debt settlement strategies and personalized financial advice.	High
6	Dashboard & Reports	Users can view loan summaries, repayment progress, financial health scores, and AI-generated reports.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
------	----------------------	-------------------------	----------------------------

			ow)
1	Performance	The system should generate AI recommendations within a few seconds and provide a responsive user experience.	High
2	Security	User information and financial data must be encrypted and protected from unauthorized access.	High
3	Availability	The application should be available 24×7 with minimal downtime.	High
4	Scalability	The system should support a growing number of users and loan records without affecting performance.	Medium
5	Reliability	Financial data and AI recommendations should remain accurate and consistent during system operation.	High
6	Usability	The interface should be simple, intuitive, and easy to use for users with minimal technical knowledge.	Medium
