Project Title	FinRelief AI – AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

The proposed solution aims to simplify debt management and improve financial decision-making using Artificial Intelligence. FinRelief AI helps users manage multiple loans, analyze financial health, and receive personalized debt settlement recommendations. The platform combines AI-powered insights with an easy-to-use dashboard, enabling users to reduce financial stress, improve repayment planning, and achieve long-term financial stability.

Project Overview	
Objective	To develop an AI-powered financial management platform that helps users manage loans, analyze debt, receive personalized financial recommendations, and improve their financial health through intelligent insights.
Scope	The project covers user authentication, loan management, AI-powered financial analysis, debt settlement recommendations, financial health monitoring, and interactive dashboards for individuals managing multiple loans.
Problem Statement	
Description	Many individuals struggle to manage multiple loans, track EMI payments, and make informed financial decisions due to the lack of personalized financial guidance and intelligent debt management tools.
Impact	Poor debt management results in missed EMI payments, increasing financial stress, lower credit scores, and inefficient repayment planning, affecting overall financial stability.
Proposed Solution	
Approach	Develop an AI-powered web application using React.js, FastAPI, SQLite, and Google Gemini AI to analyze financial information, monitor loans, generate debt settlement strategies, and provide personalized financial recommendations.
Key Features	• Secure User Registration & Login • Loan Management Dashboard • AI-Powered Financial Analysis • Personalized Debt Settlement Recommendations • Financial Health Score • EMI Reminder & Loan Tracking • Interactive Reports & Analytics • Secure Data Management
