

Scalability & Future Plan

Date	15 July 2026
Team ID	XXXXX
Project Name	FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan

This document outlines how FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform can be enhanced to support more users, larger datasets, improved security, and additional AI-powered financial services. It also presents the future roadmap for expanding the platform beyond its current implementation.

Current System Limitations

S.No	Limitation	Impact	Priority to Address
1	Supports limited concurrent users in local deployment	Performance may decrease with many simultaneous users	High
2	Uses SQLite database	Not suitable for large-scale production environments	High
3	AI recommendations depend on external AI API availability	Response delays if API is unavailable	Medium

Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Designed for small-scale users	Deploy on cloud with load balancing and auto-scaling to support thousands of users
2	Data Storage	SQLite database	Migrate to PostgreSQL or MySQL with cloud database services
3	Performance	Single backend instance	Introduce caching (Redis), optimized APIs, and asynchronous processing
4	Security	JWT authentication with password encryption	Implement Multi-Factor Authentication (MFA), HTTPS, API rate limiting, and regular security audits

Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 1	Cloud deployment using PythonAnywhere/AWS/Azure	1–2 Months	Improved accessibility and availability
Phase 2	Credit score prediction using Machine Learning	2–3 Months	More accurate financial risk assessment
Phase 3	Loan EMI calculator and repayment reminders	3–4 Months	Better financial planning for users
Phase 4	Bank API integration for automatic loan synchronization	4–6 Months	Reduced manual data entry and real-time updates
Phase 5	Mobile application (Android & iOS)	6–8 Months	Increased user accessibility
Phase 6	Multilingual AI chatbot (English, Telugu, Hindi)	8–10 Months	Better user engagement and wider reach
Phase 7	Advanced financial analytics dashboard	10–12 Months	Detailed insights into spending, savings, and debt recovery
